Why plants need _____?

Plants are all around us. Trees, grass, and flowers are plants. We cannot live without plants. We all need to eat fruits and vegetables.

But do you know what the plants eat to live and grow? The answer is plants do not eat at all! Because plants make their own food. Their leaves use sunlight to combine air and water to make food. So plants cannot live without light. Plants take in light by their leaves. Plants get light from the sun. Sunlight gives plants energy.(能量)

Sunlight energy helps plants grow and stay green.

Sunlight energy helps plants make their food. The food helps some plants make flowers. Sunlight energy helps plants make fruits and vegetables. What fruits or vegetables do you like to eat?
